FORMULATED  
FOR ALL PLANT  
VARIETIES

**FLOURISH 8-2-4 WDF  
(WATER DISPERSIBLE FERTILIZER)**

Simply measure, mix and feed. Flourish provides plants essential nutrients in a simple to use concentrated powder. Water dispersible nutrients provide an immediate release of plant nutrition. Formulated for all house plants, fruits, vegetables, flowers, trees, and shrubs. Use Flourish alone or in combination with Sustane Compost Tea to supercharge soil microbiology.

**DIRECTIONS:**

Mix 1-2 tablespoons (approximately 9-18 g) per gallon of water (or 2.25-4.5 g per liter). Apply to foliage and as a soil drench. Use higher recommended rate for heavy feeding plants. Applications can be made every 7 to 14 days. Store in a cool dry place. Close lid tightly as exposure to high humidity may cause clumping. This is to be expected and does not effect performance.
