WATER DISPERSIBLE FERTILIZER

JUST MEASURE, MIX, & FEED

PROVIDES IMMEDIATE PLANT NITROGEN

FOR ALL TYPES OF FERTIGATION & HYDROPONIC SYSTEMS

Net Weight 3 lb. (1.36 Kg)

FOR RAPID GROWTH & GREENING

MIX OF SOLUBLE NITROGEN SOURCES

HI-N 12-0-1 WDF (WATER DISPERSIBLE FERTILIZER)

Hi-N is a water dispersible, nitrogen rich fertilizer. Hi-N delivers a unique blend of water soluble nitrogen sources and is specially formulated to promote rapid plant growth. Use Hi-N alone or in combination with Sustane Compost Tea.

DIRECTIONS FOR USE:

Mix up to 1 tablespoon (6.3 g or 0.014 lb.) of Sustane Hi-N per gallon of water. Apply to foliage and as a soil drench. Applications can be made every 7 to 14 days during the growing season.

COMMERCIAL FERTIGATION:

Sustane Hi-N can be applied through watering cans, hose end sprayers, high volume wide bore sprayers, and piped irrigation lines. Mix up to 2 lb. Sustane Hi-N WDF into 100 gallons (.9 kg into 378.5 liters) of water depending on crop needs. This may be done in concentrate, and then remixed into higher volumes of water. Recommended for use on most nursery stock and foliage plants.

Store in a cool dry place. Close lid tightly as exposure to high humidity may cause clumping. This is to be expected and does not affect performance.
