Sustane Fall Winterizer 8-0-4

is a natural and organic professional grade lawn fertilizer that provides the plant nutrients that grass needs to prepare for winter resulting in a quick spring green up. Sustane Fall Winterizer promotes thicker lawns and early spring color. Sustane 8-0-4 is made from a combination of aerobically composted turkey litter, green waste compost, feather meal and sulfate of potash. Sustane combines the soil building benefits of compost with rich, natural plant nutrients into every granule.

Directions for Use:

Application Timing: October - November

Apply to lawns and landscape areas in October or November before the soil freezes but after final mowing. Sustane can be applied to established lawns as well as new seeding or when laying sod.

Instrucciones de uso:

Tiempo de aplicación: Octubre - Noviembre

Aplicar a los céspedes y jardines en octubre o noviembre, antes de que el suelo se congele, pero después de la siega final. Sustane se puede aplicar a los céspedes elegidos, así como la siembra nueva o al colocar el césped.

Coverage & Application Rates:

Apply 6 lb. per 1,000 ft² with a broadcast spreader (2.9 kg per 100²).

Provides 0.48 lb. of nitrogen per 1,000 ft². 30 lb. covers up to 5,000 ft².

Apply 10 lb. per 1,000 ft² if grass clippings are removed or if the turf is heavily used or intensively managed (provides 0.8 lb. of nitrogen per 1,000 ft²).

Covertura y Medidas de Aplicación:

Aplicar 6 libras por 1.000 pies² con un esparcidor de siembra (2,9 kg por 100 m²)

Proporciona 0,48 libras de nitrógeno por 1.000 pies².

30 lb. cubre hasta 5.000 pies².

Aplicar 10 libras por 1.000 pies² si se quitan los recortes de césped o si el césped tiene mucho uso (proporciona 0,8 libras de nitrógeno por 1.000 pies²).

Spreader Settings (walk behind)*: Ajustes del Difusor

Scotts Broadcast Spreaders**	7	Scotts Drop Spreaders	15
Earthway Broadcast Spreaders**	16	Earthway Drop Spreaders	20
AgriFab Broadcast Spreaders**	4	AgriFab Drop Spreaders	3

*Spreader Settings may vary due to walking speed and ground conditions. Settings may require adjustment to ensure proper application rates.

**Each pass is a 5 ft. (1.5 m) wide interval.

For 10 lb per 1,000 ft², reduce spreader setting by 1 and make two passes.

Sustainable Turf Maintenance Practices:

- Improve soil quality by adding compost. Good soil is the foundation to a quality lawn
- Less frequent but deep watering may result in longer roots
- Mow at a height of 3" to help maintain a thick lawn
- Maintain a high quality natural fertilizer program to encourage new growth
- Proper feeding, mowing and watering is the best way to maintain a beautiful lawn

Sustane Natural Fertilizers are an important part of the sustainable management of professional turf grass around the world. Golf courses, athletic stadiums, equestrian tracks and public parks rely on Sustane to maintain high quality playing surfaces.

Sustane products work by combining natural and organic plant nutrients with the many benefits of high quality compost:

Benefits of Sustane Compost based fertilizers:

- Slow Release Nitrogen Fertilizer feeds plants for up to 3 months
- Increases the nutrient and water holding capacity of the soil
- Reduces nutrient loss from leaching
- Improves soil structure, porosity, and stability, leading to greater root development
- Environmentally friendly and safe for kids and pets

Sustane's All Natural 4 Step Lawn Program:

Proper fertilization plays an important role in maintaining a high quality lawn. Sustane's All Natural 4 Step Lawn Fertility Program is designed to provide your lawn with the nutrients necessary to produce dense, green grass. Follow each of the 4 steps to maintain professional quality lawns all season long.

- Step 1** Early Spring Weed Preventer
- Step 2** Early Summer Turf Maintenance
- Step 3** Late Summer Starter/Overseeder
- Step 4** Fall Winterizer

Guaranteed Analysis:

Total Nitrogen (N).....	8.0%
0.8% Ammoniacal Nitrogen	
1.2% Other Water Soluble Nitrogen*	
6.0% Water Insoluble Nitrogen*
