SUSTÂNE SPRING WEED AND FEED 9-0-0 (NON-GMO GRANULATED CORN GLUTEN MEAL)

is a natural broadleaf pre-emergent that helps prevent weeds from establishing in the spring. Corn Gluten Meal is also rich in Slow Release Nitrogen which helps promote thicker lawns and lasting turf color. Corn Gluten from Sustâne is granulated and screened, allowing for easy and consistent application. Sustâne combines the soil building benefits of compost with rich, natural plant nutrients into every granule.

Sustainable Turf Maintenance Practices:

- Improve soil quality by adding compost. Good soil is the foundation to a quality lawn
- Less frequent but deep watering may result in longer roots
- Mow at a height of 3” to help maintain a thick lawn
- Maintain a high quality natural fertilizer program to encourage new growth
- Proper feeding, mowing and watering is the best way to maintain a beautiful lawn

Sustâne Natural Fertilizers are an important part of the sustainable management of professional turf grass around the world. Golf courses, athletic stadiums, equestrian tracks, and public parks rely on Sustâne to maintain high quality playing surfaces.

Benefits of Sustâne Spring Weed and Feed fertilizer:

- Slow Release Nitrogen Fertilizer feeds plants for up to 3 months
- Effective on various weeds of turf and lawns, including crabgrass, creeping bentgrass, smartweed, dandelions, redroot bigweed, purslane, lambs quarter, foxtail, barnyard grass, and Bermuda grass.
- Intended for use only on established lawns, where the substance prevents normal root development in weed seedlings.
- Not harmful to humans, to other non-target organisms, or to the environment.
- A safer alternative to toxic chemicals commonly used for weed control on lawns.

4 STEPS FOR INCREDIBLE LAWN, ALL SEASON LONG WITH SUSTÂNE’S ALL NATURAL & ORGANIC LAWN PROGRAM

Sustâne’s 4-Step Lawn Fertility Program is designed to provide your lawn with the nutrients and organic matter to produce dense, green grass. Follow each of the 4 steps to maintain professional quality lawns all season long or mix and match to suit your application needs.

SPRING

WEED & FEED

Sustâne 9-0-0 with Non-GMO Granular Corn Gluten Meal is a natural broadleaf pre-emergent that helps prevent weeds from establishing in the spring. Blended with 15% Sustâne areobic compost means no bright yellow lawn.

EARLY SUMMER

TURF MAINTENANCE

Sustâne 9-0-2 combines Slow Release Nitrogen which helps promote thick lawns and lasting turf color with quickly available natural Chilean nitrate for a fast turf response.

LATE SUMMER

STARTER/OVERSEEDER

Sustâne 4-6-4 can be applied with grass seed for a new lawn, or to overseed an existing lawn to promote dense grass coverage and crowd out weeds.

FALL

WINTERIZER

Sustâne 8-0-4 provides the plant nutrients that grass needs to prepare for winter resulting in a quick spring green up. Sustâne Fall Winterizer promotes thicker lawns and early spring color.

**Corn Gluten as a pre-emergent:** Corn gluten should be applied before germination of weed seeds. A short drying period following germination helps kill the weeds before they form roots. If it does not rain for 5 days after application, water with approximately 0.25” of water and then allow the soil to dry for a period following germination. For improved weed prevention apply at a rate of 20 lb. per 1,000 ft².

Directions for Use:

Application Timing: April - May

Apply to lawns and landscape areas in May or June once soil temperatures are above 55 F°. Corn Gluten should not be applied to new seeding or when laying sod.

Instrucciones de uso:

Tiempo de aplicación: Abril - Mayo

Aplicar al césped y a las áreas del jardín en los primeros meses de primavera, antes de que las temperaturas del suelo alcancen los 55 F°. El gluten de maíz no se debe aplicar a la nueva siembra o al poner el césped.

Coverage & Application Rates:

Apply 6 lb. per 1,000 ft² with a broadcast spreader (2.9 kg per 100 m²). Provides 0.54 lb. of nitrogen per 1,000 ft². 30 lb. covers up to 5,000 ft². Apply up to 20 lb. per 1,000 ft² for enhanced weed prevention.

Covertura y Medidas de Aplicación:

Aplicar 6 libras por 1,000 pies² con un esparcidor de siembra (2.9 kg por 100 m²). Proporciona 0.54 lb. de nitrógeno por 1,000 pies². 30 lb. cubre hasta 5,000 pies². Aplicar hasta 20 lb. por 1,000 pies² para mejorar la prevención de malezas.

Spreader Settings (walk behind)*: Ajustes del esparcidor			
Scotts Broadcast Spreaders**	7	Scotts Drop Spreaders	15
Earthway Broadcast Spreaders**	16	Earthway Drop Spreaders	20
AgriFab Broadcast Spreaders**	4	AgriFab Drop Spreaders	3
*Spreader Settings may vary due to walking speed and ground conditions. Settings may require adjustment to ensure proper application rates.			
**Each pass is a 5 ft. (1.5 m) wide interval.			
For 10 lb per 1,000 ft² , reduce spreader setting by 1 and make two passes.
